

ASX RELEASE

26 February 2025

NSW to Mandate FOGO with \$81 Million Commitment

MyEco Group Ltd (ASX: MCO) (“the Company”) welcomes the New South Wales Government’s landmark decision to mandate Food Organics and Garden Organics (FOGO) collection services for all households by July 2030, with phased implementation for businesses and institutions beginning in July 2026. This \$81 million commitment¹ underscores NSW’s leadership in driving a circular economy and tackling organic waste challenges.

The mandate aims to revolutionise waste management across NSW, with FOGO bins to be deployed in homes, supermarkets, pubs, cafes, universities, and hospitals. By diverting almost 950,000 tonnes² of organic waste from landfill annually, this initiative will transform waste into high-quality compost for parks, sporting fields, and agricultural use, contributing to healthier soils and more sustainable food production.

Significantly, the [NSW mandate permits the use of compostable caddy liners](#) that comply with Australian Standard AS 4736-2006 for commercial composting, recognising their crucial role in finding successful food waste diversion programs. The NSW Environment Protection Authority (EPA) highlights that these liners “help divert food waste from landfill by enabling easier and cleaner food waste collections for households and businesses.” The [NSW Government Guide to Best Practice FOGO](#) implementation, further emphasises that the provision of certified compostable caddy liners are a key strategy to maximise food waste diversion rates, supporting the broader goal of reducing landfill dependency and improving waste management outcomes.

As a vertically integrated producer of certified compostable products, MyEco® Group is uniquely positioned to support this transition. MyEco® certified compostable caddy liners are compliant with AS 4736-2006, aligning seamlessly with the [NSW Government Guide to Best Practice FOGO](#). This guide draws on local and international research, as well as two decades of NSW council experience, to identify measures that “recover the most amount of food waste, have minimal contamination, support a major reduction in waste to landfill and save councils money”. The provision of compostable caddy liners is identified as part of the best practice required to maximise food waste diversion rates. MyEco Group already services a number of councils with compostable caddy liners within NSW and looks forward to growing its business in this market.

CEO Richard Tegoni commented:

“This mandate is a game-changer for waste management in NSW. MyEco® Group is ready to support councils and businesses with certified compostable solutions that not only help meet regulatory requirements but also contribute to a cleaner, greener future. Our focus on innovation and sustainability positions us as a key partner in achieving NSW’s ambitious waste reduction targets.”
